[FAKE DALI PRINTS FROM PARK WEST GALLERY](#)

My husband and I bought three prints supposedly by Salvador Dali and signed by the artist. We

were told that this was a great deal and we could step off the ship and sell them for double what we paid. When we checked into it no reputable dealer would even look at the pieces when we told them they were from Park West. We did some research and found out the extent of their scams. When we called customer services to get our money back Laura Maki was extremely rude, said she couldn't help us and threatened us with their lawyers if we posted in any forums or said anything to anyone about the artwork we had bought. In my whole life I have never had dealings with a more dishonest and disreputable company.

 **PARK WEST GALLERY DIRTY WEB TACTICS**

Any moron can see that all the reports are glowing and 5 star yet the rating is only 3.5 stars? Merchant Circle needs to fix the bug so that the star rating can be reset by the user as well as just removing any negative comments before anyone can see them. This is part of the ingenious Park West "CLICK IT CAMPAIGN" invented by Tracy at Monsoon. The spin doctors are Scaglione's solution to camouflaging the truth. Trouble is anybody reading this crap is bound to know it's all the same bullshit from the same bullshit company. And the truth keeps surfacing on Google and Yahoo no matter how hard they try to suppress it.
